Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest the instant compounds wherein at least one R' is chosen from linear and branched, unsaturated hydrocarbons comprising 2-22 carbon atoms and one C=C double bond. Compositions comprising the compounds are also allowable. The compounds when formulated into a cosmetic composition yields a composition that is not sticky once applied and is slippery and easy to apply. The composition is a homogeneous, uniform film, which covers well and is comfortable to wear. The composition of the invention has the advantage of being clear, transparent or translucent. Moreover the instant compounds have the advantage of not being permanently deposited in certain supports on which they are placed such as glass, clothing or skin. See Examples in the specification on pages 20-25. EP 996 029 discloses a compound of formulas (1) and (2) wherein R is a straight chain or branched hydrocarbon group. The hydrocarbon groups recited in EP '029 are all saturated, whereas in instant invention R' (equivalent of R in EP '029) is unsaturated and have the advantage of not being permanently deposited in certain supports on which they are placed such as glass, clothing or skin.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
